

NCS ATLAS

A practical colour atlas illustrating NCS with a clear overview of the system and shows how to navigate in different colour areas which is useful when explaining NCS and demonstrating its colour design possibilities.

NCS Atlas illustrates colour relationships and colour areas having fixed colour samples with NCS Notations. Lightness information is presented for each colour which makes it easy to select colour based on differences in lightness. NCS Atlas visualises the relationship between colour and lightness.

Specifications

NCS Atlas is a binder with pages for each hue and additional pages with greys and the NCS Colour Circle. Lightness information for the 1950 colours is also included. The durable binder holds NCS Atlas together and a matt coated, whiter paper gives a good background for the colours. NCS Atlas also includes a Colour Mask for improved colour assessment and selection along with six Similarity Masks for colour combinations.

Content (*)
